

Teknotel Telemetry System

with GSM & Satellite

Satellite and GSM based advanced telemetry system for remote monitoring, control and data communication needs.

- Remote monitoring and control of systems using GSM and/or Thuraya, SMS, Data Link or GPRS/G_mPRS.
- 5-20 mA standards
- 10 digital inputs
- 4 analog inputs
- 6 digital outputs
- 2 relay outputs
- Sending messages in emergency situations

ADVANCED TECHNOLOGY SOLUTIONS AND ACCESSORIES FOR ALL YOUR NEEDS

Teknotel Telemetry System

with GSM & Satellite

Satellite and GSM based advanced telemetry system for remote monitoring, control and data communication needs.

Satellite and GSM based advanced telemetry system for remote monitoring, control and data communication.

Teknotel advanced telemetry system is an ideal solution for many situations. It provides a very affordable means of remote control and status monitoring. The system eliminates the need for personnel to make time consuming visits to remote telemetry sites.

Example application fields:

- Water supplies
- Power stations
- Waste Water
- Oil rigs
- TV & Radio Broadcast systems
- Pipeline systems

Components:

- Teknobil telemetry unit
- GPS antenna
- SAT antenna
- GSM antenna
- Power adaptor
